DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 19, line 15, please replace the text "-- isolated the electronics component. --" with "-- isolated from the electronics component. --".

2. The following is an examiner's statement of reasons for allowance:

Claims 9-18 are allowed because none of the prior art of record discloses or suggests the converter connected to the internal ground to provide electrical isolation of the internal ground from the main electrical system of the vehicle, and at least one coupling element having an electrical isolation from the main electrical system, wherein the coupling element is configured to be connected to the integrated circuit and to transmit data solely within the airbag control unit, in combination with the remaining claimed features.

Claims 19-20 are allowed because none of the prior art of record discloses or suggests a coupling element configured to exchange data solely within the control unit, wherein the coupling element exchanges data between the integrated circuit and the electronics component in a manner in which the integrated circuit remains electrically

Art Unit: 2836

isolated from the electronics component, in combination with the remaining claimed features.

Claims 21-22 are allowed because none of the prior art of record discloses or suggests a coupling element configured to transmit data to the integrated circuit in a manner in which the integrated circuit remains electrically isolated from a component at another end of the data transmission, wherein the coupling element exchanges data solely within the airbag control system, in combination with the remaining claimed features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

3. Applicant's arguments, see Remarks, filed March 2, 2009, with respect to the objections and rejections of claims 9-22 have been fully considered and are persuasive. The objections and rejections of claims 9-22 have been withdrawn.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The US patent of Dobler et al. (5,994,788) discloses a device for data communication between two electrically isolated components, and the US patents of Hansen et al. (5,934,704) and Michaels et al. (6,121,692) disclose similar vehicle systems.
